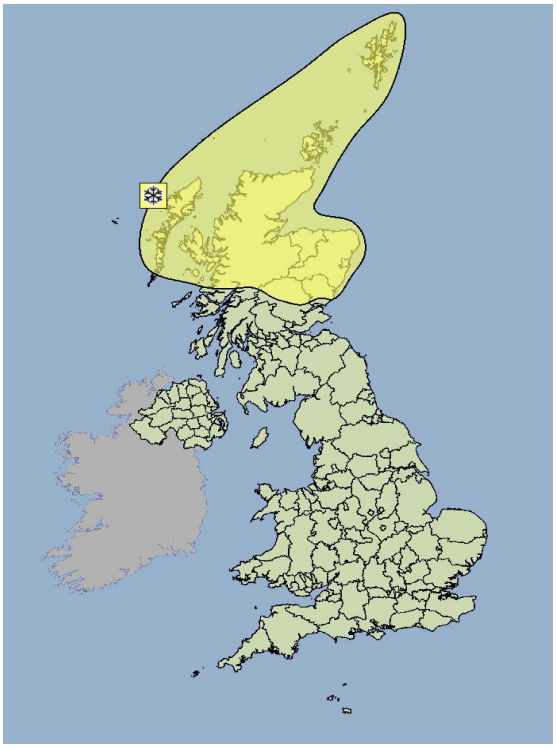
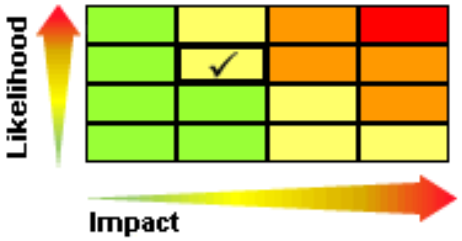
National Severe Weather Warning Service





Chief Forecasters Assessment
A cold front will push southwards across northern Scotland overnight introducing colder air and more wintry conditions, chiefly above 300 metres where 1-4 cm accumulations are expected. Across Shetland the snow levels are likely to be lower with 1-2 cm possible to low levels briefly.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **04:00 on Fri, 15th Apr 2016** until **10:00 on Fri, 15th Apr 2016**

A band of rain, falling as snow across high ground, will spread south across northern Scotland during Thursday night and into Friday morning, with snow levels lowering to around 300 metres bringing slight accumulations. At lower levels any wintry outbreaks will only bring temporary slushy accumulations.

Icy patches will also develop on some untreated surfaces towards dawn.

Please be aware of these wintry hazards bringing some difficult driving conditions.
